

Thuraya XT-PRO

The world's most advanced satellite phone.

This is Thuraya XT-PRO

The world's first and most advanced satellite phone with built-in GPS, Beidou, and Glonass capability, offering real flexibility when moving around on-field. Featuring the biggest display of any satellite phone on the market, a compact, and ruggedized design, and its Gorilla glass screen display, this pocket-sized handset is highly jet water and dust resistant, as well as shockproof, making it the best communications companion on the toughest missions.

With the longest talk-time on any satellite phone and the ability to make calls, and SMS messages, the Thuraya XT-PRO makes it easy to keep HQ and operational teams connected at all times. You'll also have access to data connection for emails and web browsing, assisting you in keeping your operations and missions running at peak performance. Its compatibility with several accessories and the presence of a dedicated SOS button means, your emergency contact is only a call away from you.

Product Features

Selectable Navigation Systems

With XT-PRO, you can choose your preferred navigation system and select between GPS, BeiDou, and Glonass for the highest accuracy and added security in every region.

Longest talk-time on any satellite phone

Thuraya's XT-PRO offers a talk-time of up to 9 hours and has a standby time of up to 100 hours providing you with reliable and robust communications wherever you need it.

Glare resistant Gorilla® glass display

The XT-PRO satellite phone is designed for the harshest of environments. It is built with toughened glass and with a customized outdoor display for easy visibility even in direct sunlight.

Easy to use, Dedicated SOS button

The SOS button can be used even when the satellite phone is switched off. Press and hold the SOS button for 3 seconds to start the phone and send an alert (a call and/or SMS) to any pre-programmed number.

Compact and rugged design

Small enough to fit in your pocket, the Thuraya XT-PRO is jet water and dust resistant as well as shockproof.

Calls, SMS, fax, and internet connectivity

Make calls, send SMS and fax messages. You can also connect your laptop or PC to access the internet in satellite mode whenever terrestrial networks are unavailable.

The best communications partner on all your missions.

Supported by the most robust and powerful satellite network

The advanced omnidirectional antenna of the XT-PRO ensures an uninterrupted signal when on-the-move. Receive call notifications even if your satellite signal is too weak to receive the call itself. This is very useful when the phone is in your pocket with the antenna stowed.

Additional features

For convenience, we've added a speakerphone, an address book, alarms, a calculator, a calendar, call logs, conference calls, contact groups, speed dialing, a stopwatch, world times, and much more.
