

Dual Mode

Dual SIM

Thuraya XT-PRO DUAL

The World's First Dual-Mode, Dual-SIM Phone

The Thuraya XT-PRO DUAL is the world's first dual-mode, dual-SIM phone, bridging the gap between satellite and terrestrial communications. By using both a satellite SIM card and a LTE SIM card, you can now move in and out of terrestrial coverage with ease, enjoying connectivity no matter where you are.

Highly ruggedized with a shockproof, water and dust resistant body, the XT-PRO DUAL also comes with advanced navigation capabilities through GPS, BeiDou, Glonass and Galileo for the highest flexibility in all regions.

No matter where you are or how remote your location, we keep you connected. Thuraya's comprehensive satellite network provides reliable, clear and uninterrupted communications in more than 150 countries across Europe, Africa, Asia and Australia; and in GSM-mode the phone supports most 4G/3G/2G frequencies across the world.

Product Features

Dual Mode. Dual Sim

Communicate seamlessly in satellite and cellular mode: the world's first phone to combine dual-mode and dual-SIM, the Thuraya XT-PRO DUAL has two SIM card slots for complete flexibility and choice.

SAT and LTE "Always On"

Make and receive calls simultaneously on both networks with the XT-PRO DUAL's unique SAT and LTE "Always On" function.

Advanced Navigation Capabilities

Select your preferred navigation system and choose between GPS, BeiDou, Glonass and Galileo for the highest flexibility in all regions. Your XT-PRO DUAL can then be used to send your coordinates to pre-defined numbers via SMS, or email.

Glare Resistant Gorilla® Glass Display

Toughened glass for harsh conditions and a customized outdoor display delivers easy readability in direct sunlight, no matter how bright the conditions are.

Rugged Design

The XT-PRO DUAL is water and dust resistant as well as shockproof to withstand harsh environments.

Convergence You Can Customize

Most Powerful Battery

Equipped with a long-lasting battery, the XT-PRO DUAL has a talk-time of up to 11 hours and a standby time of up to 100 hours, enabling reliable communications whenever you need them across an extended period. The status indicator gives you accurate readings with the remaining battery percentage indicated in 1% intervals.

Dedicated SOS Button

The XT-PRO DUAL has a dedicated SOS button, which is easy to use in times of distress. Even when the phone is switched off, simply press and hold the SOS button for three seconds. This starts the handset and triggers the emergency service call (and/or SMS) to any pre-programmed number.

Incoming Call Notifications in Satellite Mode

The call notification function operates in satellite mode even if your satellite signal is too weak to receive the call itself. This is particularly useful when your phone is in your pocket with the antenna stowed, keeping you connected at all times.

Convenient Tracking Features for Your Safety

The XT-PRO DUAL is equipped with advanced tracking capabilities, offering three different options based on preset time intervals, distance traveled, and detection of movement outside a preset geofence of your choice.

Product Specifications

System/ Frequencies	Thuraya L-Band Satellite	4G: B1, B3, B7, B8, B20, B28A 3G: B1, B3, B8 2G: B3, B8
